

Historical Analytics provides deep payments intelligence insights highlighting performance overview, authorizations, and captures. Showing settlement by counts, amounts, and channel.

Access

Go to <https://ebc2.cybersource.com> to enter login information:

Organization Name: your Account or Merchant ID

User Name: your CyberSource credentials

Password: your CyberSource password

Expand the left navigation panel and click on **Analytics**. Under **Historical**, select **Country**.

Historical Analytics Country

Section 1 Horizontal Filtering Toolbar and Export Function

If logged in to the SSO or “_acct” level, the **Country** section of Historical Analytics will display default results for **Merchant ID: All**, **Date Range: Last 7 Days**, and **Reporting As: USD**. Variations on these dimensions may be selected. Additional applied filters are located below with three default applied filters for **Transaction Status: Success and Declines**, **Count/Amount: Count**, and **Card Country: All**. There is a drop-down menu to select additional dimensions to further explore. The example below shows an applied filter for **Billing Country: Canada**, with the drop-down menu revealing more filters that could be applied to **Country** results.

Horizontal Filtering Toolbar and Export Function

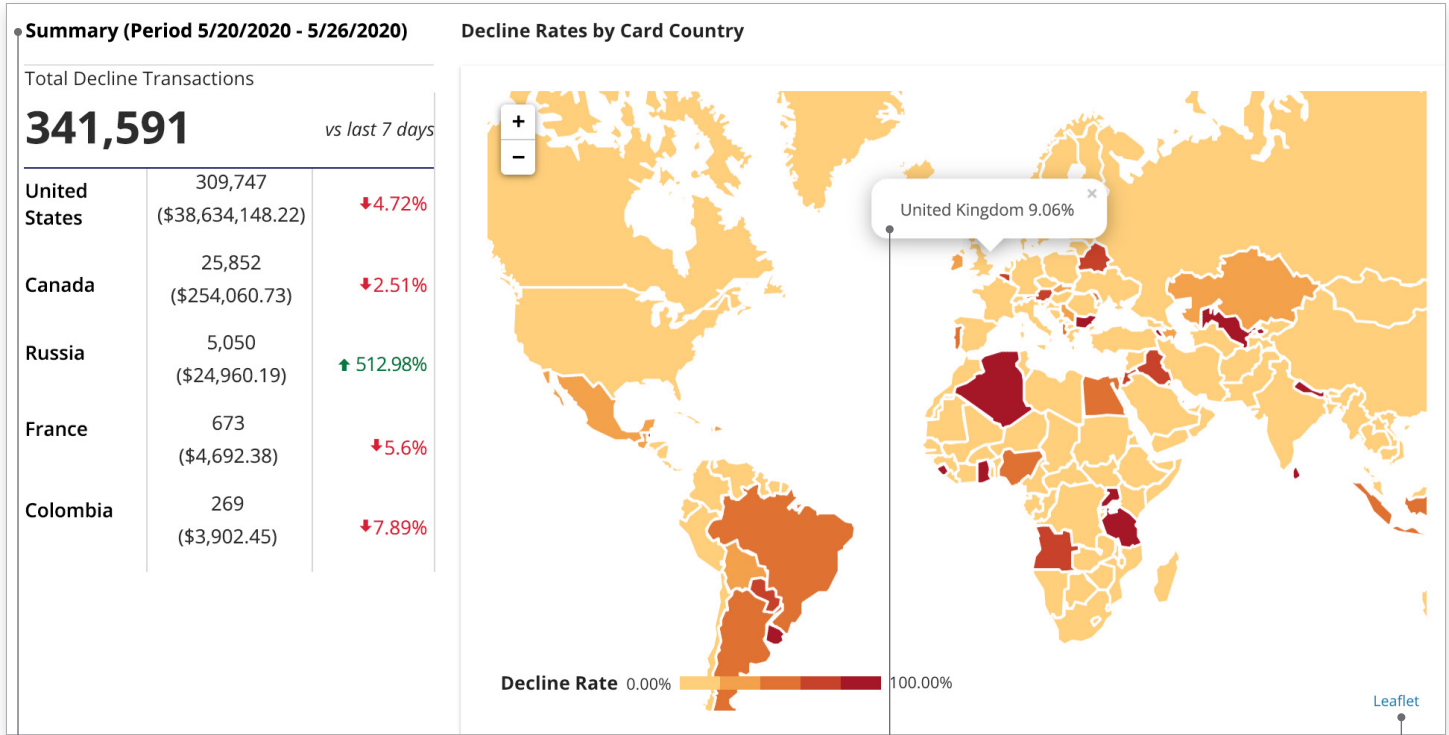

The screenshot shows the 'Country' section of the Historical Analytics interface. At the top right, there is an 'EXPORT' button with a download icon. Below this, a horizontal toolbar displays 'Showing results for' followed by three default filters: 'Merchant ID: All', 'Date Range: Last 7 Days', and 'Reporting As: USD'. A dropdown menu titled 'Choose a filter' is open, listing various dimensions: Currency, Region, Payment Type Method, Processor, Payment Channel, and Integration Method. The main toolbar also includes three default filters: 'Declines', 'Count/Amount: Count', and 'Card Country: All'. A fourth filter, 'Billing Country: Canada', is highlighted in a darker shade of blue and has an 'X' icon next to it. To the right of the filters is a 'CLEAR FILTERS' button. Callouts provide the following information:

- A range of dimensions available for additional applied filters (pointing to the dropdown menu).
- Clicking the “X” removes the selected filter, differentiated by the darker shade of blue (pointing to the 'Billing Country: Canada' filter).
- Select **Clear Filters** to remove any darker blue applied filters and to revert all applied filters to default states – this action will not alter selections for **Merchant ID**, **Date Range**, and **Reporting As** filters (pointing to the 'CLEAR FILTERS' button).
- Export the data with applied filters as a .csv or .json file (pointing to the 'EXPORT' button).

Section 2 My Business Analytics – Country for Declines

The left side of this section shows a summary table for **Total Decline Transactions** with count and amount line items for five countries in the selected time period. The right side of the section shows an interactive map of the **Decline Rates by Card Country**. Selecting any country in the map displays a pop-up with **Decline Rate** for that country.

My Business Analytics – Country for Declines

Change the date range by using the horizontal filtering toolbar

View decline rates by hovering over a country to display a pop-up

Link takes user to an external mapping website

Section 3 Country Comparisons for Declines

This displays a bar chart showing **Success/Decline Rates by Card Country**. Hovering over any bar displays a pop-up for those measures. Selecting the **Show Tabular Data** option below the chart reveals the **Country Details for Declines** table with additional data.

Country Comparisons for Declines

Click the toggle or label text to reveal an additional table below this section

View pop-ups for Success and Decline Rates

Section 4 Country Details for Declines

Clicking the **Show Tabular Data** toggle moves it to the right and reveals a table with all dimensions used to display the data. Selecting the arrows next to each header displays the data in alphabetical order from A to Z or Z to A. Filter fields below the header allow searching within the category. The header area scrolls horizontally to reveal more dimensions.
